PROFILE SUMMARY

Highly motivated Java Full Stack Developer with strong skills in building responsive web applications using Java, Spring Boot, React, REST APIs, and SQL. Passionate about solving real-world problems through clean code, scalable backend logic, and user-friendly frontend interfaces. Quick learner with hands-on project experience, strong debugging abilities, and the ability to work both independently and in collaborative teams.

PROJECTS

1. Malicious Website Detector (Java + React)

Developed a full-stack application that detects harmful and phishing websites using URL analysis, threat rules, and API validation. Implemented secure REST APIs using Spring Boot and built an intuitive React-based UI for real-time results.

2. AI-News Summarizer (OpenAI API + Full Stack)

Created a smart web tool that extracts article content from any news URL and generates a concise summary using the OpenAI API. Backend built with Node.js & Express; frontend developed with React for a seamless user experience.

3. Personal Portfolio Website

Designed and deployed a clean and modern portfolio showcasing projects, skills, and achievements. Integrated GitHub links, responsive layouts, and performance-optimized components.

4. E-Commerce Cart System (Node.js + HTML + CSS)

Built a lightweight e-commerce cart system enabling users to browse products, add/remove items, and view real-time cart totals. Implemented backend logic using Node.js and created a simple, responsive UI with HTML and CSS.

INTERNSHIP

Company: Litz Tech.

Domain: Web Development.

Duration: 30 days.

Worked on front-end development using HTML, CSS, JavaScript.

Built responsive UI components and layouts.

Collaborated with team members and used Git/GitHub for version control.
